Biology and Fertility of Soils

Founded in 1985
by J. C. G. Ottow

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-0727, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 6 13-9 93-92 51; Fax: 6 13-9 52-82 43; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 26 · 1998

Abd-Alla MH, Omar SA: Wheat straw and cellulolytic fungi application increases nodulation, nodule efficiency and growth of fenugreek (*Trigonella foenum-graceum* L.) grown in saline soil 58
Adholeya A → Bhatia NP
Adhya TK → Kumaraswamy S
Alkemade JRM → Schouten AJ
Alva AK → Dou H
Andrés JA, Correa NS, Rosas SB: Survival and symbiotic properties of *Bradyrhizobium japonicum* in the presence of thiram: isolation of fungicide resistant strains 141

Bâ AM → Guissou T
Bedaux JJM → Berg MP
Berg MP, Kniese JP, Bedaux JJM, Verhoef HA: Dynamics and stratification of functional groups of micro- and mesoarthropods in the organic layer of a Scots pine forest 268
Berg MP, Kniese JP, Verhoef HA: Dynamics and stratification of bacteria and fungi in the organic layers of a scots pine forest soil 313
Berg MP, Verhoef HA: Ecological characteristics of a nitrogen-saturated coniferous forest in The Netherlands 258
Bernier N: Earthworm feeding activity and development of the humus profile 215
Beyaert RP → Liang BC
Bhatia NP, Adholeya A, Sharma A: Biomass production and changes in soil productivity during longterm cultivation of *Prosopis juliflora* (Swartz) DC inoculated with VA mycorrhiza and *Rhizobium* spp. in a semi-arid wasteland 208
Bhattarai T, Hess D: Growth and yield responses of a Nepalese spring wheat cultivar to the inoculation with Nepalese *Azospirillum* spp at various levels of nitrogen fertilization 72
Bonhomme E → Dendooven L
Breland TA: Modelling mineralization of plant residues on soil: effect of physical protection 78
Breland TA, Hansen S: Comparison of the difference method and ^{15}N technique for studying the fate of nitrogen from plant residues in soil 164
Buresh RJ → Maroko JB

Cameron KC → Stewart DPC
Carballas T → Villar MC
Caswell-Chen EP → Vaast Ph
Cesco S → Pinton R
Chanway CP → Shishido M
Cheng KT → Young CC
Cluzeau D → Jégou D
Coelho RRR → Mangrich AS
Cornforth LS → Stewart DPC
Correa NS → Andrés JA
Cuenca G, De Andrade Z, Escalante G: Arbuscular mycorrhizae in the rehabilitation of fragile degraded tropical lands 107

De Andrade Z → Cuenca G
Dendooven L, Bonhomme E, Merckx R, Vlassak K: N dynamics and sources of N_2O production following pig slurry application to a loamy soil 224
Devis X → Henault C
Didden WAM, Fluiter R de: Dynamics and stratification of Enchytraeidae in the organic layer of a Scots pine forest 305
Dinel H → Paré T
Dou H, Alva AK: Nitrogen uptake and growth of two citrus rootstock seedlings in a sandy soil receiving different controlled-release fertilizer sources 169
Dumontet S → Paré T
Duponnois R → Guissou T

Escalante G → Cuenca G
Esbroek MLP van → Schouten AJ

Fluiter R de → Didden WAM

Gandon Y → Jégou D
Germon JC → Henault C
Gil-Sotres F → Trasar-Cepeda C
Gomes RC → Mangrich AS
González-Prieto SJ → Villar MC
Guinko S → Guissou T
Guissou T, Bâ AM, Ouadba J-M, Guinko S, Duponnois R: Responses of *Parkia biglobosa* (Jacq.) Benth, *Tamarindus indica* L. and *Zizyphus mauritiana* Lam. to arbuscular mycorrhizal fungi in a phosphorus-deficient sandy soil 194

Hansen S → Breland TA
Hatch DJ, Jarvis SC, Parkinson RJ: Concurrent measurements of net mineralization, nitrification, denitrification and leaching from field incubated soil cores 323
Hatch DJ → Lovell RD
Hayatsu M → Kojima T
Heijmans GJSM → Janssen MPM
Henault C, Devis X, Page S, Justes E, Reau R, Germon JC: Nitrous oxide emissions under different soil and land management conditions 199
Hess D → Bhattarai T
Hýsek J, Šarapatka B: Relationship between phosphatase active bacteria and phosphatase activities in forest soils 112

Inubushi K → Rajbanshi SS

Janssen MPM, Heijmans GJSM: Dynamics and stratification of protozoa in the organic layer of a Scots pine forest 285
Jarvis SC → Hatch DJ
Jégou D, Cluzeau D, Wolf HJ, Gandon Y, Tréhen P: Assessment of the burrow system of *Lumbricus terrestris, Aporrectodea giardi*, and *Aporrectodea caliginosa* using X-ray computed tomography 116
Jordan D → Kim KY
Justes E → Henault C

Kadiata BD, Mulongoy K, Mambani B: Pruning effect on nitrogen nutrient release in the root zone of *Albizia lebbeck* and *Leucaena leucocephala* 187
Kim KY, Jordan D, McDonald GA: Effect of phosphate-solubilizing bacteria and vesicular-arbuscular mycorrhizae on tomato growth and soil microbial activity 79
Kirsch AS → Subler S
Kleinschmidt AW → Martinez CE
Klironomos JN, Ursic M: Density-dependent grazing on the extraradical hyphal network of the arbuscular mycorrhizal fungus, *Glomus intraradices*, by the collembolan, *Folsomia candida* 250
Kniese JP → Berg MP
Kojima T, Hayatsu M, Saito M: Intraradical hyphae phosphatase of the arbuscular mycorrhizal fungus, *Gigaspora margarita* 331
Kulasooriya SA → Seneviratne G
Kumaraswamy S, Rath AK, Satpathy SN, Ramakrishnan B, Adhya TK, Sethunathan N: Influence of the insecticide carbofuran on the production and oxidation of methane in a flooded rice soil 362
Kuo S, Sainju UM: Nitrogen mineralization and availability of mixed leguminous and non-leguminous cover crop residues in soil 346

Leirós C → Trasar-Cepeda C
Lermen AW → Mangrich AS
Liang BC, MacKenzie AF, Schnitzer M, Monreal CM, Voroney PR, Beyaert RP: Management-induced change in labile soil organic matter under continuous corn in eastern Canadian soils 88
Linhares LF → Mangrich AS
Lovell RD, Hatch DJ: Stimulation of microbial activity following spring applications of nitrogen 28

MacKenzie AF → Liang BC
Mahmood T, Tahir GR, Malik KA, Shamsi SRA: Denitrification losses from an irrigated sandy-clay loam under a wheat-maize cropping system receiving different fertilizer treatments 35
Main BE → Stewart DPC
Malik KA → Mahmood T
Mambani B → Kadiata BD
Mangrich AS, Lermen AW, Santos EJ, Gomes RC, Coelho RRR, Linhares LF, Senesi N: Electron paramagnetic reso-
